

To Whom It May Concern,

It is my pleasure and honour to nominate Lorenzo L. Ancora for his work as a volunteer on the Dragora GNU/Linux-Libre project, an independent GNU/Linux distribution based on concepts of simplicity and aimed at the free software community. Dragora is founded by Matías Fonzo in 2007 to support the free software movement. Our project involves people from all over the world, who with their time and effort try to provide a complete operating system that respects the freedom of the user.

Starting in March 2024, Lorenzo offered his skills to improve the official website of Dragora (<https://www.dragora.org>), proving his knowledge of HTML 5 and CSS3, as well as offering a new project logo based on the SVG format. The result is a well-balanced website that adapts very well to mobile devices (which have smaller screen sizes).

For Lorenzo's contributions, not only by his habit to communicate in advance, but also suggesting in private and public meetings all kinds of improvements to the project, I am very pleased to recommend him. If you have any questions, please feel free to email me.

Sincerely,

A handwritten signature in black ink, appearing to read "Matías Fonzo".

Matías Fonzo

Dragora's Founder
